

- Proportion of GO groups (spot J)
- Group1 = response to hydrogen peroxide: 29.1%
 - Group2 = import into cell: 20.7%
 - Group3 = regulation of circadian rhythm: 10.3%
 - Group4 = transcription preinitiation complex assembly: 9.3%
 - Group5 = starch metabolic process: 6.2%
 - Group6 = rhythmic process: 4.2%
 - Group7 = formaldehyde metabolic process: 3.2%
 - Group8 = monoatomic cation homeostasis: 3.0%
 - protein geranylgeranylation: 2.7%
 - prenylation: 2.4%
 - circadian rhythm: 2.4%
 - photorespiration: 2.2%
 - carbon fixation: 2.2%
 - seed development: 2.0%
