

The bar chart displays the frequency of 50 categories across five groups. The y-axis represents frequency, ranging from 0 to 5. The x-axis represents categories, grouped by color: Group A (light purple), Group B (dark purple), Group C (blue), Group D (green), and Group E (orange). The distribution is highly variable, with many categories having a frequency of 5 and others having a frequency of 0.

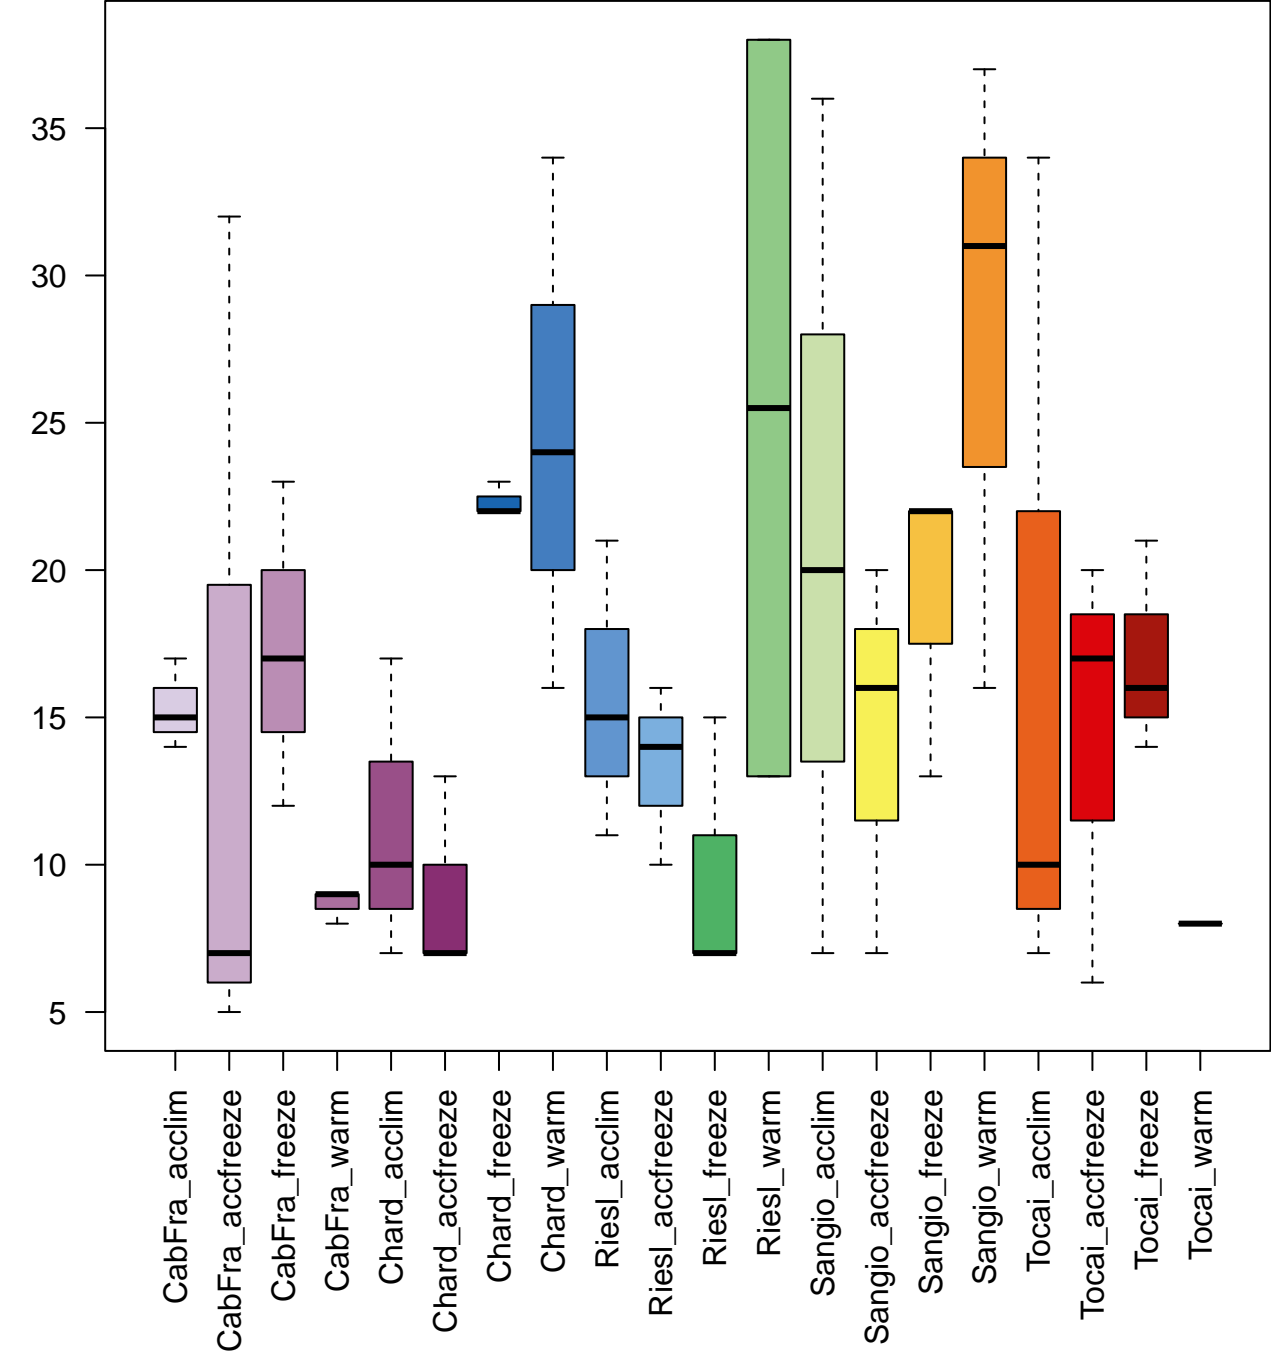

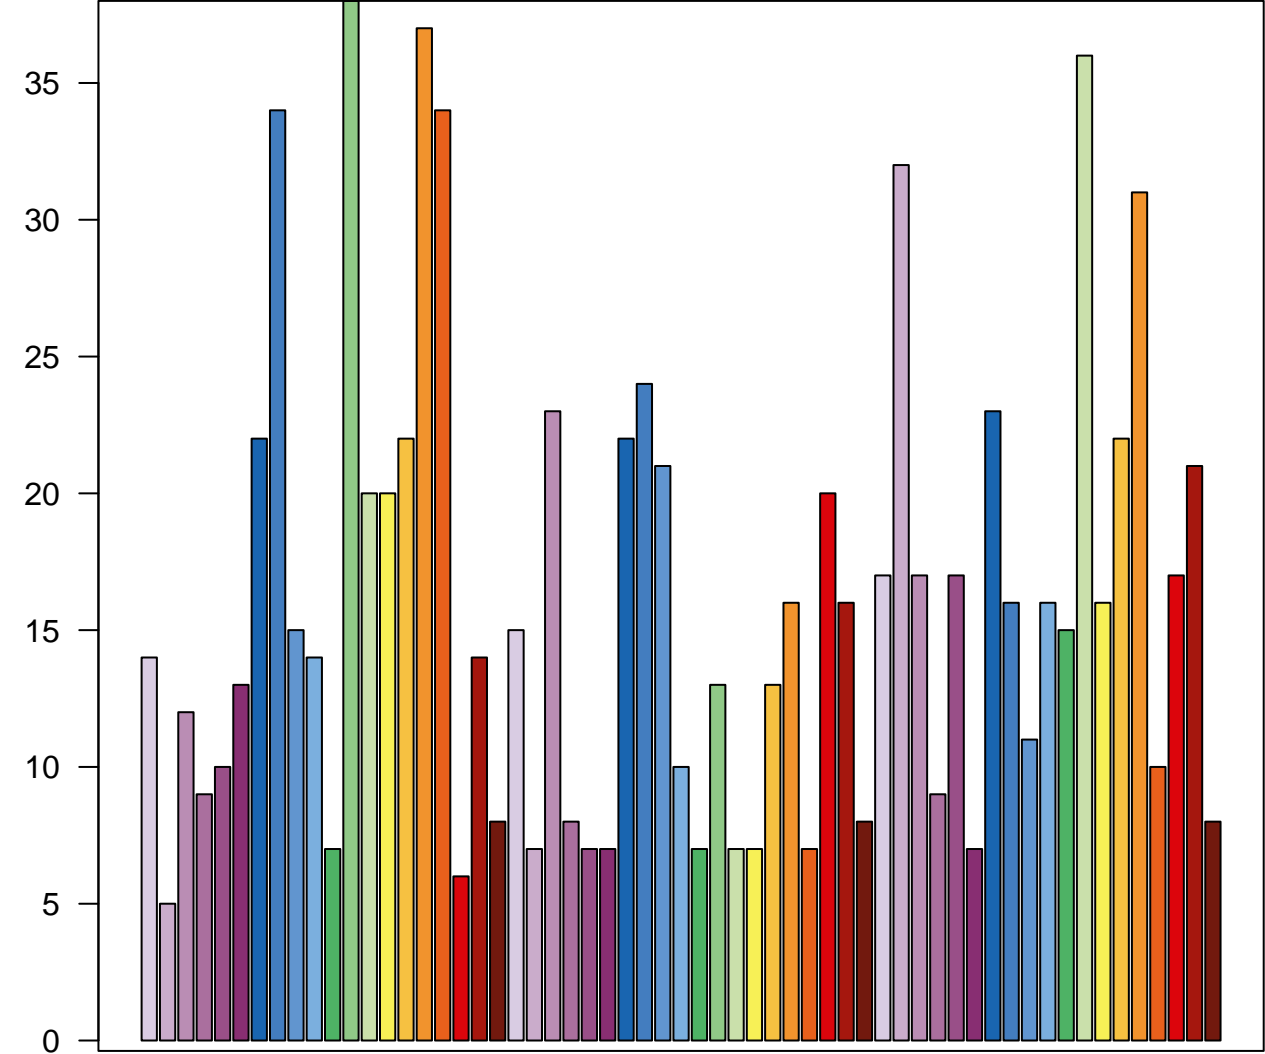

Fraction of samples showing respective number of overexpression spots

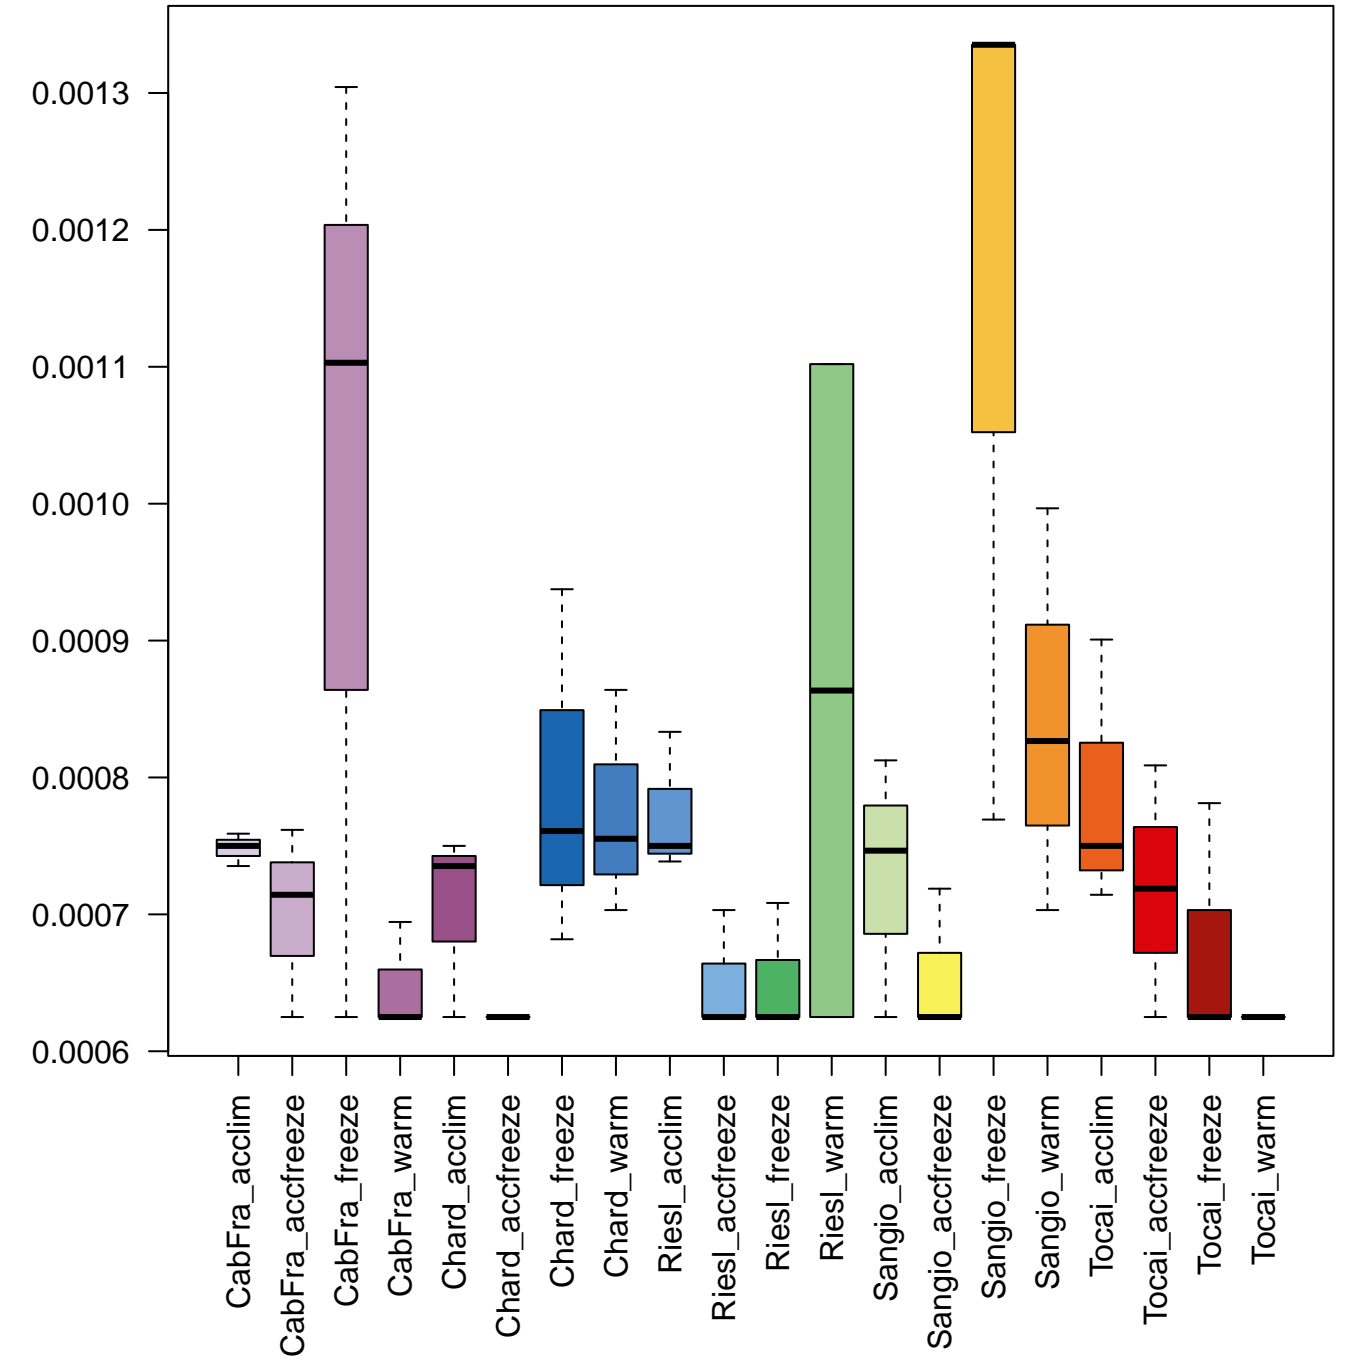

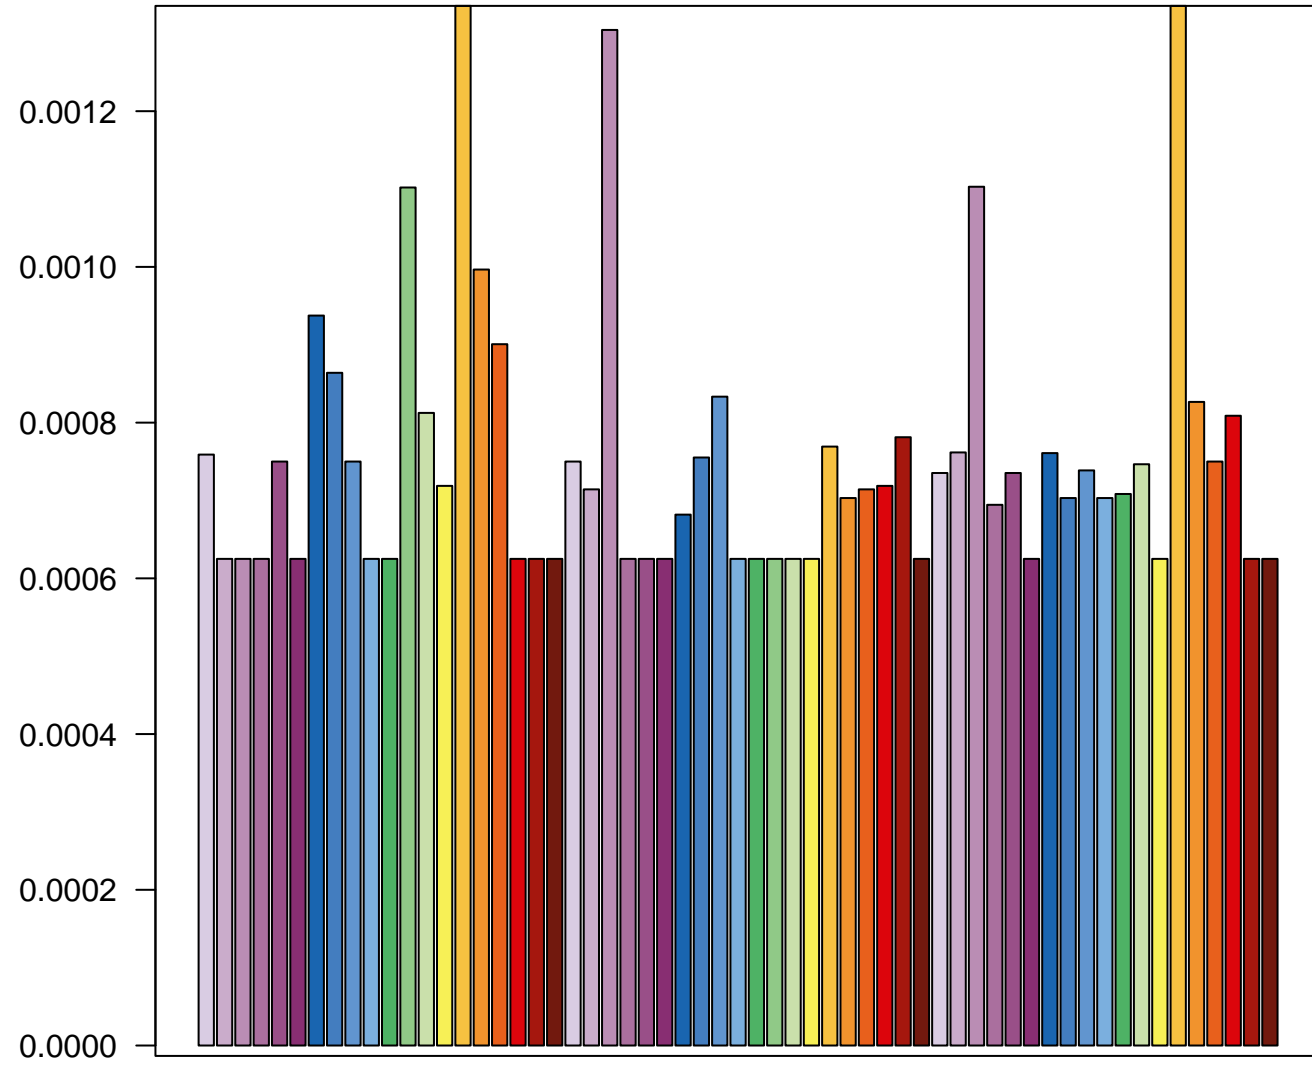

Fraction of overexpressed metagenes

Length of borderline along overexpressed metagenes

Compactness of spots

Shape of spots
